ENERGY28

Energy begins with a balanced diet, with the body assimilating life-giving nutrients from the soil, processed into edible forms by plants. Because our diets are generally lacking in high-quality nutrients, we often turn to sugar and caffeine for quick energy at the expense of the health and sustained energy we could obtain from true nutrients. When the body is well nourished, a person is less likely to be depressed and more likely to have adequate energy levels. *Energy28* was created to deliver supplemental natural energy from whole-food and natural sources.

Golden Chlorella Omega

Golden Chlorella is a key ingredient in *Energy28*. It is a unique nutrient-dense, ultra-pure, mild-tasting micro-algae that provides naturally occurring amino acids, vitamins and minerals. It is a complete functional food containing 50 percent heart-healthy omega 3, 6 and 9 oils by weight and 20 percent dietary fiber. It is non-GMO and grown sustainably and locally in the USA without pesticides or herbicides.

24 Organic Fruits and Veggies

Fruits and vegetables are the fundamental nutritional factors in a healthy diet. *Energy28* incorporates 13 organic **superfruits** (pomegranate, açai, goji and noni) and **fruits** (tart cherry, raspberry, strawberry, cranberry, banana, blueberry, apple, aronia berry and sweet cherry), plus 11 organic **vegetables** and **sprouts**

(carrot, pumpkin, pea, spinach, tomato, broccoli, broccoli sprouts, onion sprouts, daikon radish, kale and alfalfa). We took extra care to use organic produce to ensure no pesticide, herbicide or fungicide residues, chemical fertilizers or genetically modified ingredients were included in our formula.

Organic Maca

Peruvian maca is a root vegetable, shaped like a radish, that grows high in the harsh climate of the Andes Mountains in South America at elevations up to 15,000 feet. Native Peruvians have used maca for more than two millennia. A high-energy food, maca is rich in nutritional content, including amino acids and natural vitamins as well as calcium, magnesium, potassium and other minerals. We use organic maca in *Energy28*.

Bioenergy RIBOSE

D-ribose (ribose) is used by all the body's cells and is essential in energy metabolism. Our bodies make it innately, but our cells lack the ability to produce it fast enough or in sufficient quantity to effectively satisfy the loss of energy from our cells. That is why supplementing the body's natural processes with ribose can be so beneficial.

Bioenergy RIBOSE, the premium D-ribose we use in *Energy28*, is a patented supplement that is clinically proven, naturally certified and has FDA GRAS (generally recognized as safe) approval.

Rhodiola

Rhodiola rosea (also known as Arctic root or golden root) has been a popular plant in traditional medical systems in Russia and Scandinavian countries for centuries, with a reputation for stimulating the nervous system, enhancing work performance and eliminating fatigue.

Multiple Uses

Each packet of *Energy28* supplies 1,525 mg of nutrient-rich whole food plus D-ribose and rhodiola for energy support. It can be used every day, at work, for sports applications and anytime you need an energy boost. Sip it right from the pack or add to a water bottle. We demand a lot from our bodies. Give yours the nutrient support it needs and feel the difference.*
